Hologrow App Installation Process (for Shopify)

App Installation

First, confirm that the admin backend of the store where you want to install the application is already logged in.
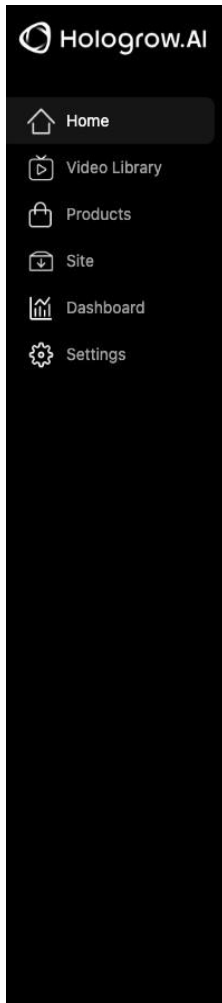

Method 1: Directly visit the link：https://apps.shopify.com/hologrow-1

Method 2: Search for "Hologrow" in the Shopify App Store and click Install

New User Registration & Setup

Step 1 : First-time Registration

After successful installation, you will be redirected to the registration page where you must fill in the required information to set your information
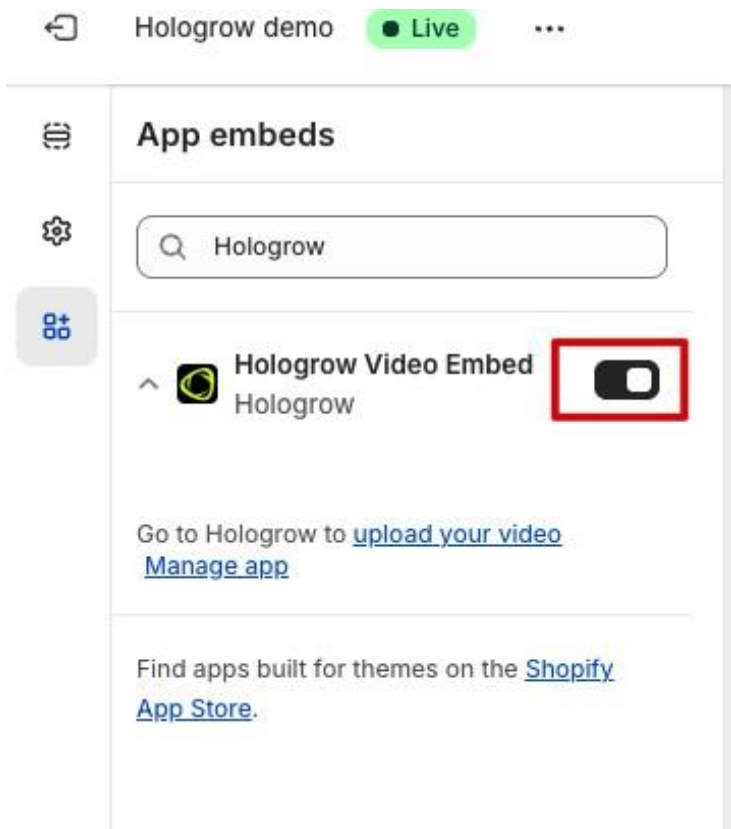

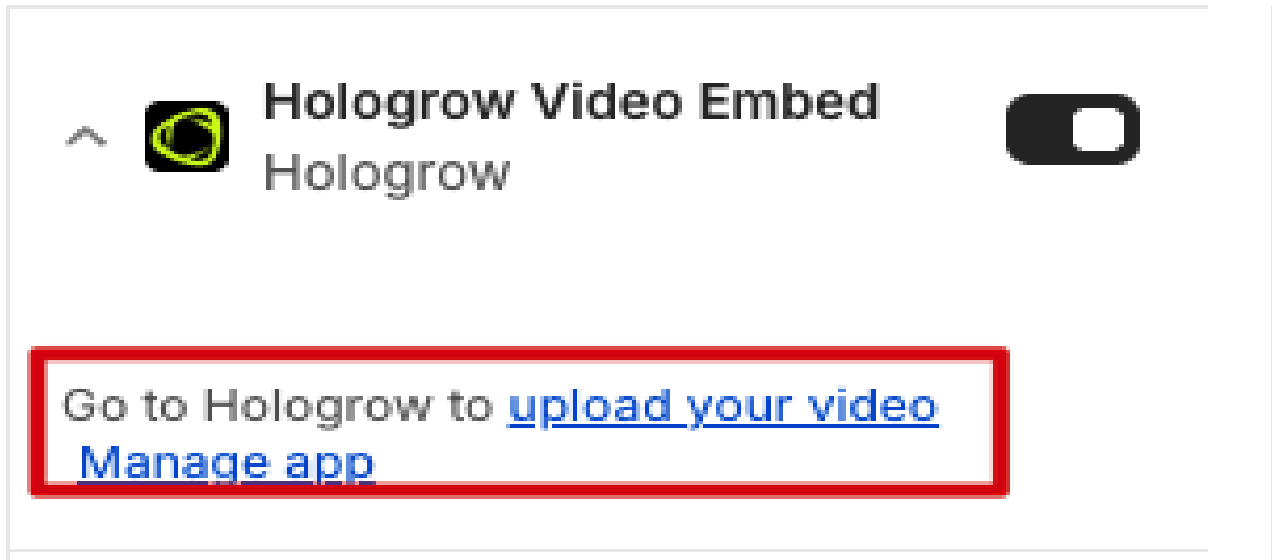

The system will automatically jump to the App embeds page. You must turn on the application display switch
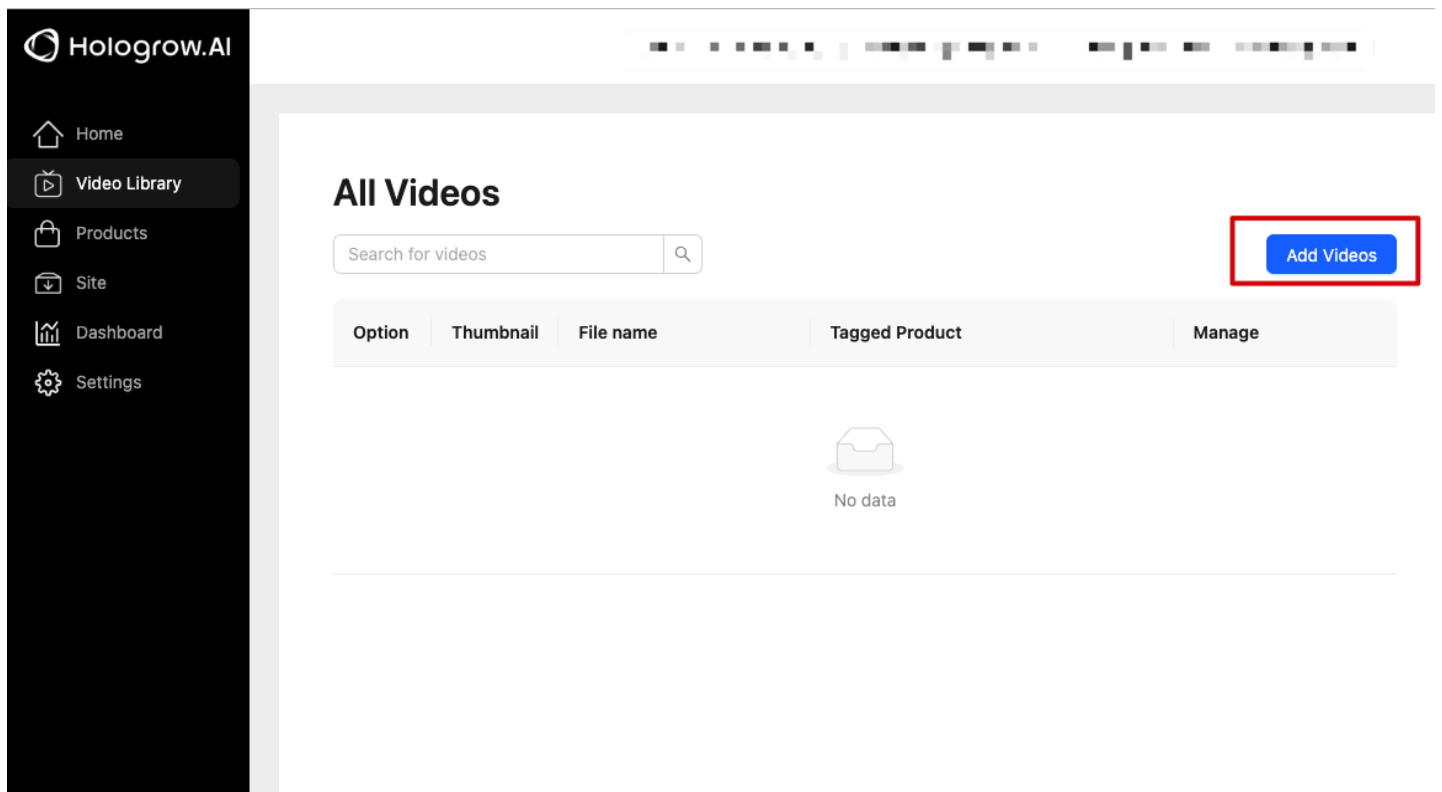

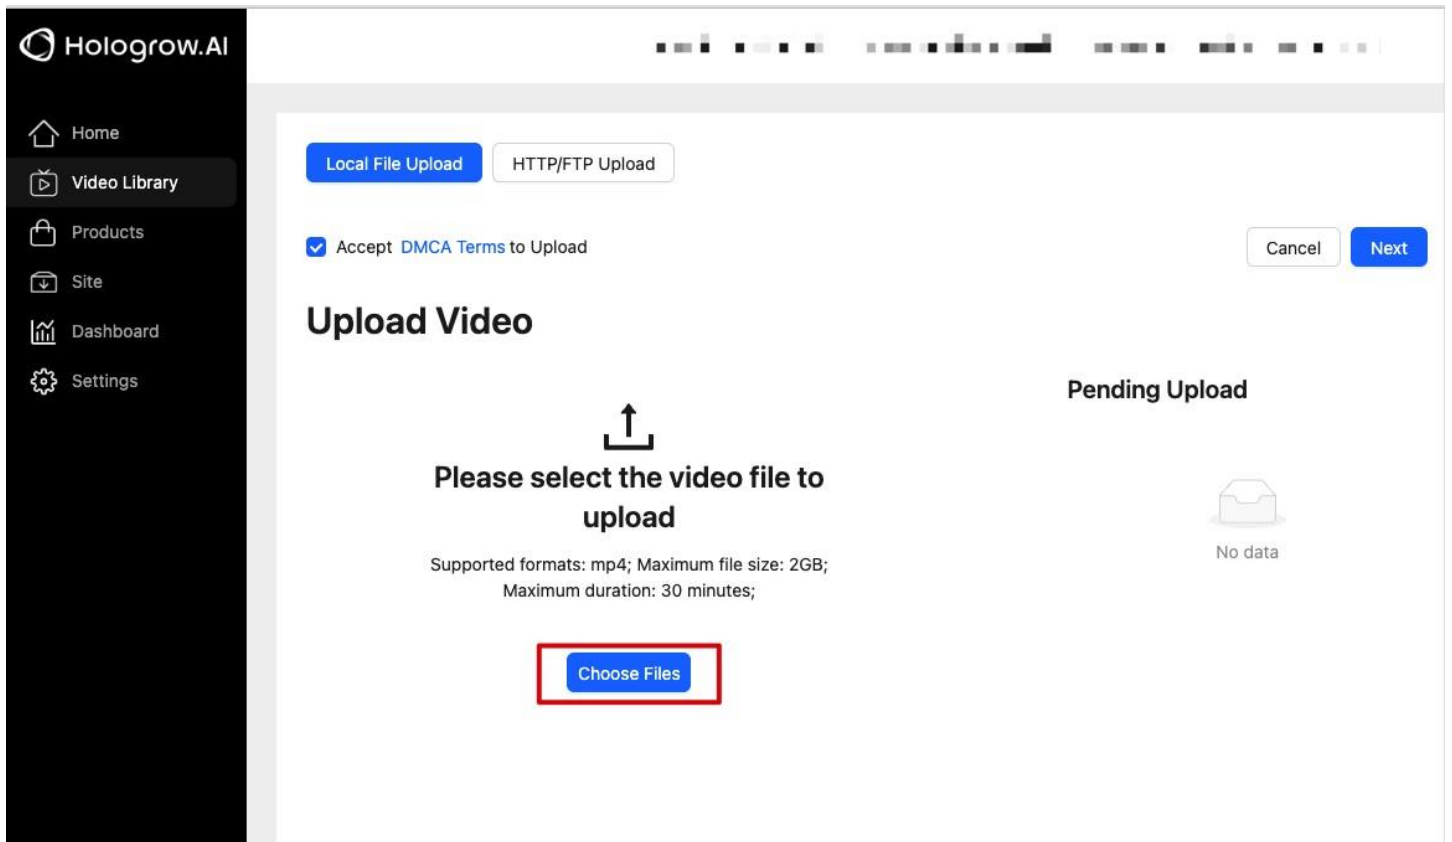

Step 2 : Access the App Interface

On the App embeds page , click Upload your video Manage app

# Step 3.1 : Select and Upload Video Material

On the [Video Library] page, click [Add Video] and upload video footage by selecting files
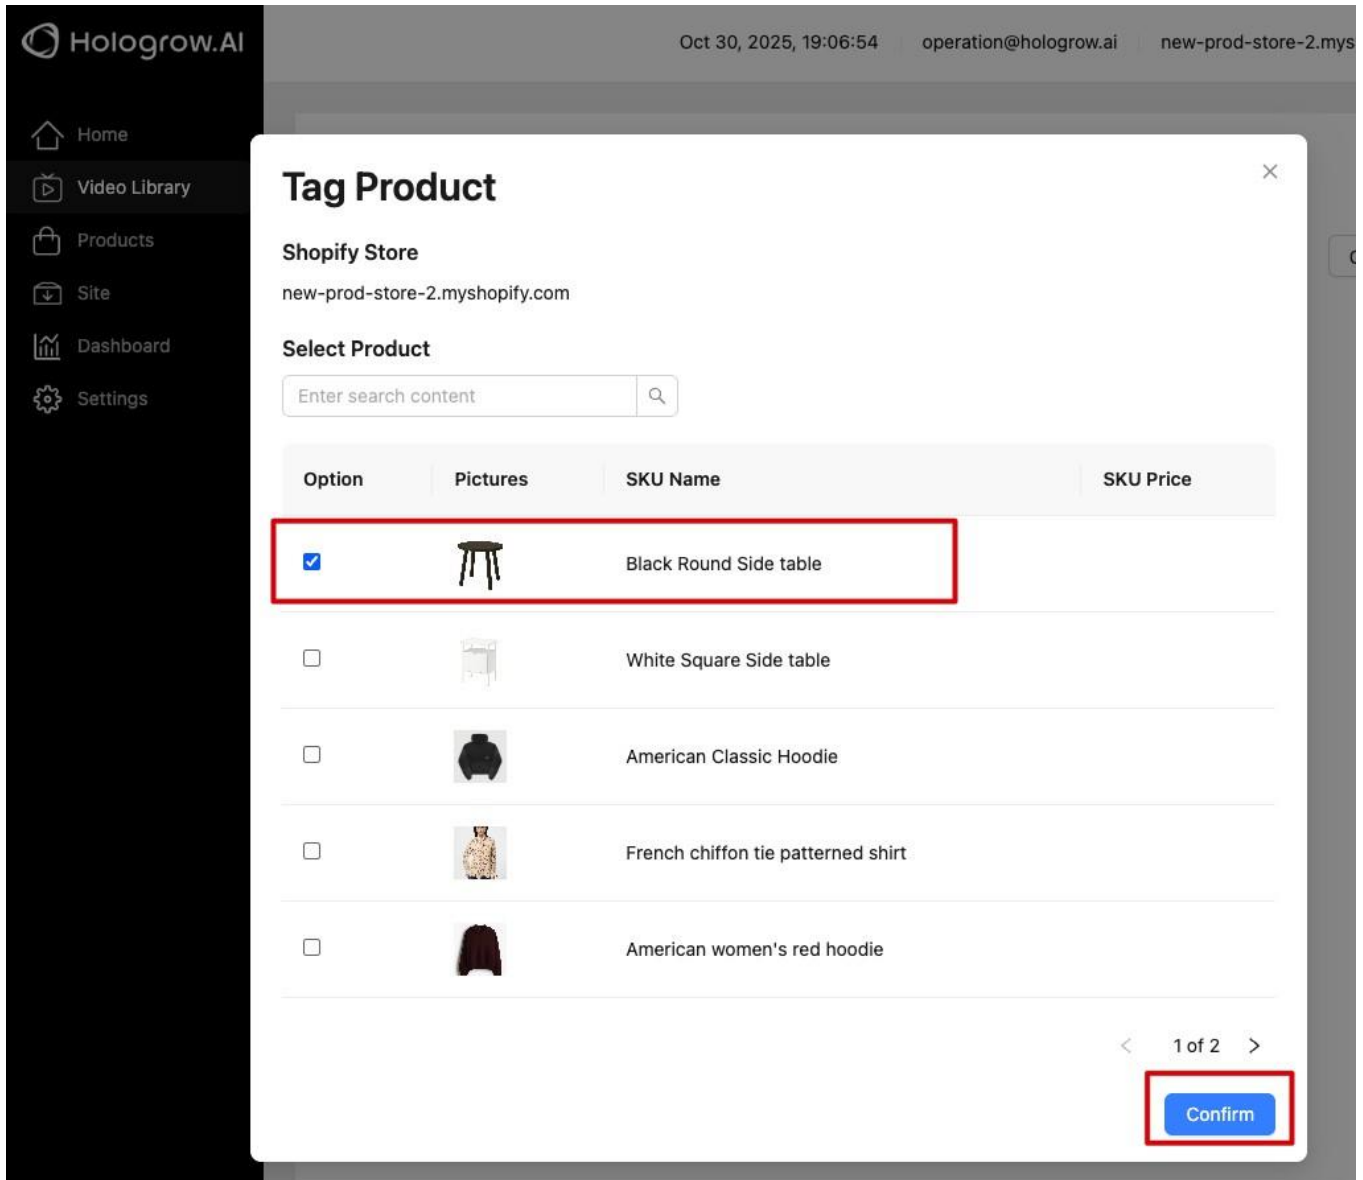

Step 3.2 : Bind products and upload

After selecting video assets, click the [Bind Product] page, choose the corresponding product to bind with the video assets, and confirm the video upload is successful. The backend AI will automatically trim and process the video

Step 3.3 : Smart Product Showcase Videos

On the 【Products】 page, enable the Best Seller button to have the item intelligently recommended in the video floating window on the homepage

Additional Notes

1. On the【Dashboard】 page, you can view the relevant data.

2. 【Settings】Page
-[Display Settings] allows you to configure the position/size of the floating window
-[Video Rules] allows you to configure pop-up rules
